HOW TO CREATE A GOOGLE ALERT
To create a Google alert, go to www.google.com/alerts. Click in the box and type in what you want to get an alert for, for example, TRID. Now type in the email you want the alert to get sent to. Choose how often you want the alert to occur, the kinds of sources you want to be alerted about, the language the sources are in, and how many sources you want to be alerted of. Click create alert. You can create more than one alert. You can also create alerts for region-specific things. For example, we can create an alert for Omaha title insurance. Again, put in the email you want your alert to go to, choose how often, sources, language, and how many from the drop down menus available. When you have chosen the options that you want, click create alert.
